

AMS-IX Port

- **Become a full member of AMS-IX through GlobalConnect**
- **Save on IP Transit costs**
- **Shorter response times and more Internet traffic resilience**
- **Available at three GlobalConnect data centres and via the fibre network of GlobalConnect**
- **AMS-IX is with more than 500 members one of the worlds largest internet exchanges**

AMS-IX Port enables you to exchange IP traffic at one of the world's largest internet exchanges in Amsterdam, AMS-IX. As an AMS-IX Reseller GlobalConnect provides you direct access to AMS-IX at our data centres in Copenhagen, Kolding, Aarhus (Stilling), Hamburg and at our network hubs in Stockholm and Oslo.

Cost savings

With the AMS-IX Port you can peer with more than 500 AMS-IX other members. A peering agreement is an arrangement where the parties agree to exchange Internet traffic for free. Thus peering agreements usually result in substantial savings on IP transit charges.

Optimised traffic flow

Peering traffic is exchanged directly between the sender's and the receiver's own networks without passing through 3rd party transit networks - this means faster response times. Moreover, the peering traffic has two separate traffic paths available, the peering connection and the standard IP transit connection. Thus peering agreements also provide traffic protection..

Advantages of connecting via GlobalConnect

A standard connection to the AMS-IX requires a physical presence at an AMS-IX data centre in Amsterdam. However, as an AMS-IX reseller GlobalConnect is able to offer AMS-IX membership without this requirement. Furthermore, GlobalConnect can connect you at lower data rates than the normal 1 Gbit/s minimum requirement. In addition to 1 Gbit/s ports, 500 Mbit/s, and 250 Mbit/s ports are available from GlobalConnect.

Member facilities

Full membership of AMS-IX is included as a part of the AMS-IX Port solution and provides access to all AMS-IX member facilities, including peering agreement tools, access to approximately 350 members via a common route server, access to events, meetings, and voting rights at the AMS-IX General Assembly.

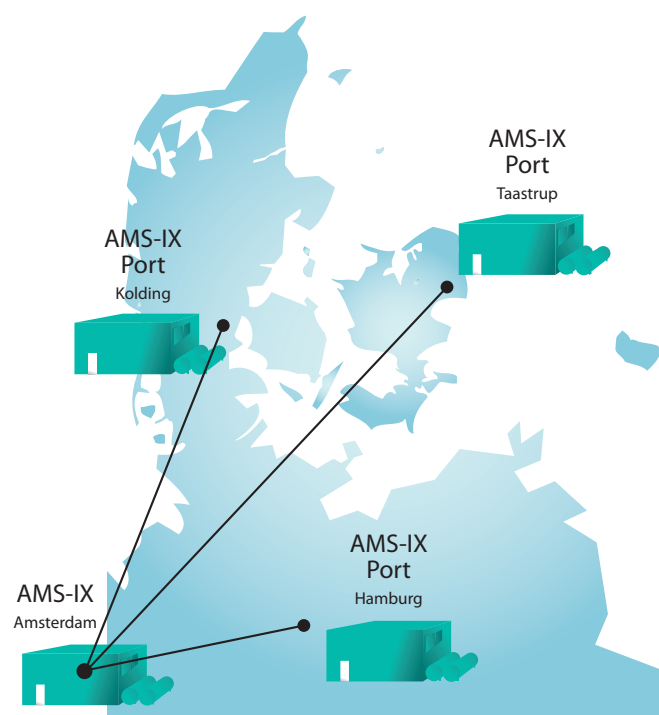

Figure 1: AMS-IX Port enables full membership of the AMS-IX without any obligation to have presence in Amsterdam.

Technical Data

Combinations with other GlobalConnect services

- **Countrywide availability** through the GlobalConnect fibre network covering all of Denmark and parts of Northern Germany
- **Content-IX** is a specialized IX for exchange of traffic between content providers and ISPs
- **IP Transit** is a professional Internet backbone connection, based on uplinks to several of the largest global internet carriers
- **Rack space & floor space:** GlobalConnect's datacentres offer a safe and secure operating environment for your IT-systems, including redundant power supplies, cooling, access control, 24/7 monitoring

Connection Options

250 Mbit/s optical port
500 Mbit/s optical port
1 Gbit/s optical port

Support

Technical emergency hotline: 24/7/365 via GlobalConnect's OMC
Regarding peering and non-operational enquiries: Monday to Friday 9-17

Terms of membership on the AMS-IX

The business area of the member must relate to the internet

Peering policies

A majority of members provide free peering access, while others offer peering according to various policies

Points of Presence

Hoerskaetten 3, DK 2630 Taastrup
Kokbjerg 8, DK 6000 Kolding
Wendenstrasse 379, D-20537 Hamburg
Niels Bohrsvej 19, dk-8660 Skanderborg
Elektronikhøjden 6 , O598 Oslo
Hans Möller Gasmans vei 9 , 175 43 Järfälla, Stockholm

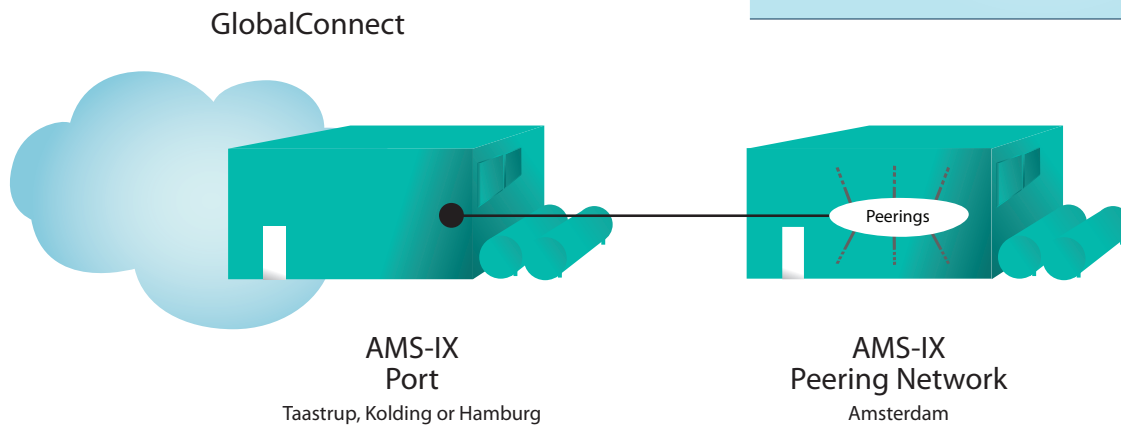

Figure 2: AMS-IX Port provides direct access to the AMS IX peering network with potential for a large number of peering agreements.
